What the technology is, does, and lets you do.

JavaScript is a scripting language for the web that we will use along with the canvas element in HTML5 to create interactive applications that our client wishes to add in her new website.

How you are learning about it.

We are using
the book
*JavaScript: The
Definitive Guide*
to learn
JavaScript.

What it is good for and how to use it.

JavaScript is good for creating interactive applications for web pages when used together with HTML and CSS.

What it is not good for; how not to use it.

JavaScript is often misused for features that users may find annoying such as popup windows and can also cause security/privacy issues by being exploited.

An example with working code and/or screenshot(s)
